SUMMARY

Certified Microsoft Solutions Developer, ScrumMaster, and community leader with demonstrated success designing and implementing scalable, robust applications. Extensive experience leading teams to innovate while creating simple solutions to complex problems.

PROFESSIONAL EXPERIENCE

Senior IT Project Leader

Boston Consulting Group

📅 02/2017 - Ongoing   📍 Boston, MA

- Managed Partner applications

Senior Software Engineer

Saylent

📅 10/2014 - 11/2016   📍 Franklin, MA

- Led the adoption of Azure cloud services to replace existing infrastructure, saving thousands of dollars per month.
- Configured continuous integration pipelines to automate deployments and release packages for all Saylent products.
- Developed high performance C# applications to assist in data ETL and tooling.
- Refactored and enhanced code for current products to provide performance and security benefits.

Senior Growth Hacker - join.me

LogMeIn

📅 04/2014 - 10/2014   📍 Boston, MA

- Worked closely with product, marketing, and business development teams to create hypotheses for business growth opportunities.
- Designed and built Salesforce integration for join.me.
- Developed analytics platform for tracking millions of monthly events for LogMeIn sites and products.
- Trained coworkers on Microsoft Fakes framework, Ninject IoC concepts, and the .NET framework.

Senior Integrations Engineer

Experian Data Quality

📅 05/2013 - 03/2014   📍 Boston, MA

- Responsible for architecting solutions for partners and resellers in order to integrate their products with EDQ data quality services.
- Helped in creating and launching the EDQ Partner Platform, a robust web services platform and user portal used by OEM partners and resellers to provide data quality solutions to their clients.
- Lead developer on multiple internal innovation projects.

PROFESSIONAL EXPERIENCE

Product Evangelist
Collette Vacations

📅 11/2011 - 05/2013   📍 Pawtucket, RI

- Tasked with building 'online presentation' team with the purpose of generating new revenue and product interest, and help train 30k agents and group leaders.
- Created various useful team tools in C# including GoToMeeting video transcoder utility and URL link shortening tool.
- Advised application developers on integrating with partner APIs.

Sr. Application Developer
Collette Vacations

📅 05/2007 - 11/2011   📍 Pawtucket, RI

- Worked on a team of 2-5 programmers and reported directly to Director of Application Development to implement company-wide solutions.
- Development and extension of core classes for new reservation system in VB.NET.
- Provided architecture and performed core development of corporate training management system (Collette University).
- Updated, refactored, and maintained various elements of both Reservation (Web Forms) and Product (WinForms) systems.

WHO AM I?

Experienced

20 years of developing and designing scalable, robust applications. I routinely give presentations on technology and product development.

Current

A strong history of leading teams to adopt innovative tech stacks, and not afraid to learn new technologies quickly to achieve results.

Problem Solver

I like creating simple solutions to complex problems using software and thinking aloud with other great minds.

Agile

Proponent of agile and lean development methodologies utilizing Scrum, Kanban, and effective combinations of the two.
